

# Synergy Collaborative Desks

Synergy facilitates team based interaction by providing a working space that enables students to meet, connect and collaborate with visual information.

Synergy - Seated Height

## Team-Based Learning

Using Synergy, everyone is grouped around the table as equals, promoting an inclusive process that encourages everyone to contribute ideas for the team's success.

Student-centred collaborative learning enhances students academic ability and employment potential by:

- improving problem solving skills
- enhancing conceptual understanding
- promoting teamwork and communication
- increasing positive attitudes towards work

# Agile Working Solutions to Enhance Collaboration

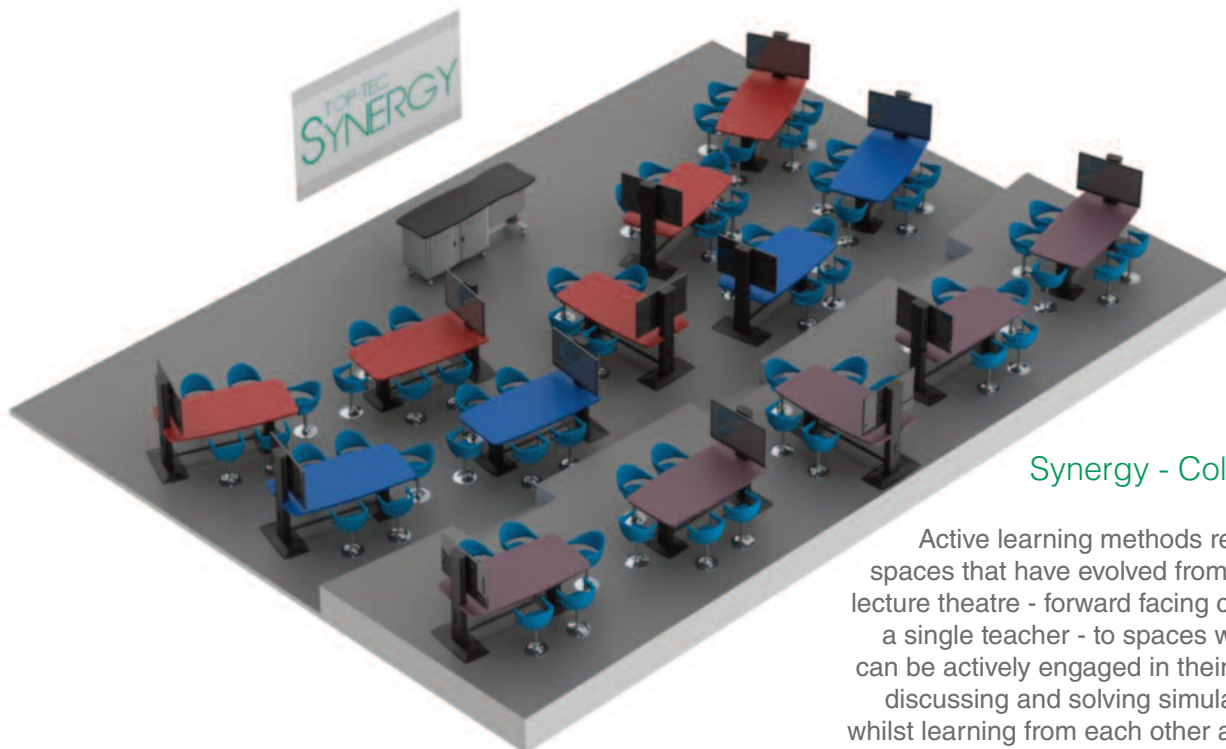

Instead of passively listening to lecturers, students are set tasks that actively engage them in finding solutions through discussion and various team working methodologies. High-quality audio visual facilities are essential for providing access to on-line resources and fully supporting the participation of every student, resulting in deeper understanding and an enhanced learning experience.

## Benefits

- Provides IT, AV and meeting desk facilities within the same working space; creating a **productive, multi-functional learning environment**
- **Connects a wide range of inputs** for group display, including PCs, Apple TV products (iPads etc.), laptops and other mobile technology
- **Creates agile learning spaces** that can be used for an engaging mixture of lecture and active learning pedagogies
- With **no floor or wall fixings**, rooms can be quickly reconfigured without any infrastructure costs
- **Integrated security** protects displays and fixed equipment from casual theft
- Connectivity and power points in the mast and front legs keep the worktop clear of cables, allowing **full use of table surface**
- Colours, heights and worktop shapes can be configured to match individual **workspace needs and brand identities**

Synergy - Standing Height

Synergy - Collaboratorium

Active learning methods require learning spaces that have evolved from the traditional lecture theatre - forward facing centred around a single teacher - to spaces where students can be actively engaged in their own learning, discussing and solving simulated problems, whilst learning from each other as well as from the teacher.

As we design and manufacture all of our products in-house, we are able to provide a unique level of customisation on our Synergys so that your requirements can be met in full.

Customised Synergys - University of Bradford

## Features

- KVM switch for changing between PC, laptops and other inputs to the screen
- Integrated cable management for the screen, computer, AV and data equipment
- Choose a mounting position to select your preferred screen height
- Recessed design to maximise leg room
- Stylish and robust construction
- Customised screen mount for sizes upto 65"

## Options

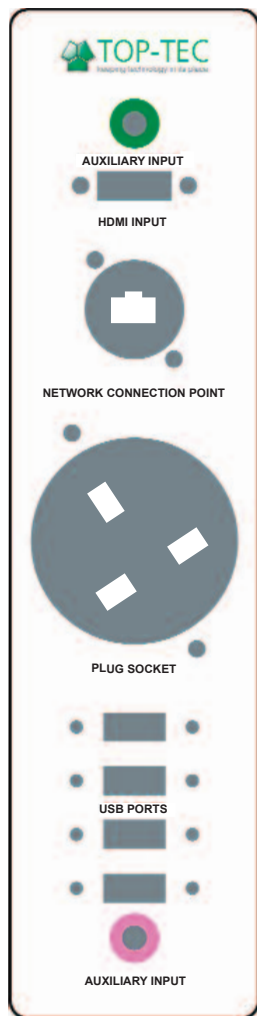

- Available at two desk heights as standard
- Pop up power and data points available
- Available in a range of colours and worktop finishes

# Synergy - Specification

With a choice of table sizes, colours, and available in two heights, Synergy tables integrate in-room and connecting technology that promote collaboration within your establishment.

Synergy can host a combination of permanent technology whilst supporting the ad-hoc connection of iPads, iPhones, etc. ensuring that everyone benefits from sharing visual information.

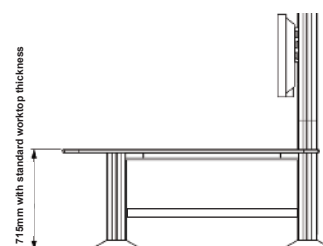

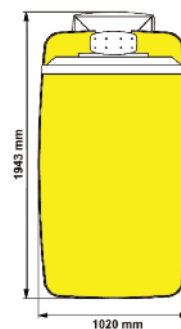

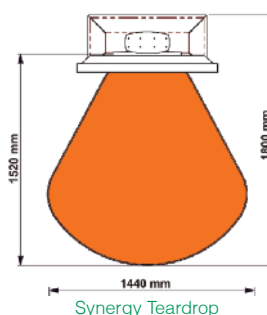

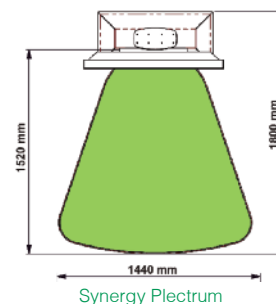

## Connectivity

Standard Connectivity includes:

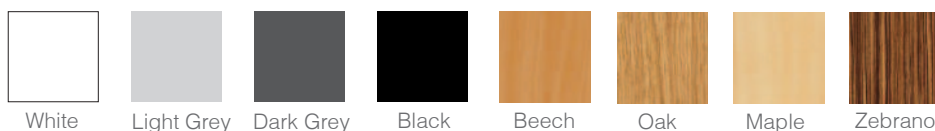

- Adjustable computer cradle
- Secure screen mount for 37" to 60" screens (J-LITE02).
- Integrated KVM switch
- Input Connection Plate (left)
  - HDMI
  - Network
  - USB x 4
  - Power Socket
  - Auxiliary Inputs
- Full cable management within display column and beneath worktop

Bespoke technology integration can be provided by one of our specialist partners.
